

Brown University

Faculty Positions in Molecular Toxicology and Environmental Carcinogenesis

Applications with outstanding research accomplishments are invited for two tenure-track or tenured positions at the Assistant, Associate or Full Professor level in the Department of Pathology and Laboratory Medicine at the Warren Alpert Medical School of Brown University. Appointments at the levels of Associate and Full Professor require a successful track record of peer-reviewed funding and a national (Associate) or international (Full) reputation. Strong commitment to teaching and mentoring is expected. Applicants must have a Ph.D., Sc.D., and/or M.D. degree and postdoctoral research experience.

Applicants should have a laboratory-based research program in molecular mechanisms of environmentally-induced disease. Opportunities for collaborative, interdisciplinary research include a Superfund Research Program, a NIEHS Formative Center for the Evaluation of Environmental Impacts on Fetal Development, and the Institute of Molecular and Nanoscale Innovation (IMNI) at Brown University. The appointee will participate in undergraduate, graduate and/or medical teaching and mentoring, and serve as a predoctoral and postdoctoral research mentor for a NIEHS-funded T32 Training Program in Environmental Pathology. The department is expanding its infrastructure and research programs with a goal of establishing an NIEHS Environmental Health Center. There are opportunities to assume leadership roles in interdisciplinary research and educational programs. Research space will be provided in a newly-renovated laboratory with modern core facilities for molecular pathology, imaging, genomics and proteomics, flow cytometry, analytical chemistry, nanotechnology, and access to Human Tissue Banks.

Candidates should submit a curriculum vitae, names of five references (three for Assistant Professor applications), and a statement of research plans and career objectives to:

Kim Boekelheide, M.D., Ph.D.
Search Committee Chair
Professor, Department of Pathology and Laboratory Medicine
Brown University
Providence, Rhode Island 02912
Kim_Boekelheide@brown.edu

Review of applications will begin on November 1, 2011 and will continue until the positions are filled. Brown University is an EEO/AA employer and encourages applications from women, minorities, and protected persons.
